User Guide
AI Release Notes Generator

What is this app?

TheAI Release Notes Generator is a helpful app for Jira Cloud. It helps you quickly create neat and clear release notes using artificial intelligence (AI). No more writing summaries by hand — the app does it
for you!

It's perfect for:

• Product managers

• Developers

• QA teams

• Business stakeholders

Key Things You Can Do

Feature	What It Does
JQL Mode	Use a custom query to pull issues directly from Jira.
Manual Filter Mode	Select issues by project, issue type, and status — all with checkboxes.
Release Version Mode	Pick a released version and (optionally) narrow it down by epic
AI Summary	AI reads the issues and creates a professional, easy-to-read summary
Download/Copy	You can copy the summary, download it (txt/pdf/md), or send it via email
History Page	See your previous summaries and re-use them anytime

How to Use the App

1. Start on the Input Page

This is where you pick how you want to generate the release summary:

- **JQL Mode:** Enter a Jira query

- **Manual Filter Mode:** Pick a project and then choose filters like issue type or status

- **Release Version Mode:** Pick a project and select a released version. You can even narrow it to a specific Epic.

Add an optional custom prompt like "Make it customer-friendly" to improve the AI summary tone.

Then click **Generate Summary.**

2. View the Summary

Once generated, you'll land on the Summary Page. Here, you can:

- Copy it

- Download it as text, markdown, or PDF

- Go back to the Input page to generate a new one

3. Check Your History

Go to the History Page to view the last 10 summaries you created. For each summary, you can:

- Re-read it

- Download it as text, markdown, or PDF

Do I Need to Code or Set Up Anything?

No. The app works out-of-the-box. Just install it from the Marketplace and start generating summaries.

AI Behind the Scenes

We use OpenAI's GPT-4 model to write your summary. You don't need an OpenAI key — it's all handled securely in the backend.

Need Help?

If you have questions, feedback, or problems:

• Contact us via the **Atlassian Marketplace support** tab

Data & Privacy

• No external login is required.

• Your summaries are stored only for your user account.

• We don't store or share your issue data beyond summary generation.
